Hi kim

Mark from dart taxis in march

My concern

The enforcement of a wheelchair after plate 300 would be set down areas would have to be the distance of the vehicle + 3 meters if it is a rear load and if it was a side load the distance of 3 meters for the ramps to drop on pavement also the pickup would involve the same requirements and in march we don't have them. Also if you make the griffin a drop and go as it is double yellow lines you are expecting the public to walk to the rank , the police have no problem with us parking there as it stops damage to shops as they will be forced to walk into town
