

**Resource Use and Renewable Energy Supplementary Planning Document (SPD) (formerly titled 'Resource Use SPD')  
Statement of Public Participation: January 2014 Consultation**

***Explanatory Note:***

*This statement sets out:*

- *the persons that were consulted by Fenland District Council during the January 2014 consultation on the draft Resource Use SPD;*
- *a summary of the main issues raised by those persons; and*
- *how these issues have been addressed by the Council in the revised draft SPD.*

*For information purposes, this statement also sets out the changes to the SPD which are necessary as a result of the amendments made to the Local Plan (previously referred to as the Core Strategy) prior to its adoption and any other changes (such as factual updates) which have been identified by Fenland District Council.*

**1. Introduction**

- 1.1. Fenland District Council wishes to thank all those who took the time between 14 January 2014 and 24 February 2014 to comment on the draft Resource Use SPD.
- 1.2. The SPD has been prepared to provide guidance on resource use and renewable energy in order to support Policy LP14 "Responding to Climate Change and Managing the Risk of Flooding in Fenland" of the Local Plan, a development plan document (DPD). The SPD will help developers in preparing planning applications for submission to Fenland District Council and will also aid the Council in making informed decisions on relevant applications.
- 1.3. When adopted, it will have the status of a Supplementary Planning Document (SPD) and will form part of the Council's planning policy framework, supplementing policy LP14 of the Fenland Local Plan (DPD). The SPD will have status as a material consideration in the determination of planning applications, though the Local Plan will have the greatest 'weight' in legal terms when the Council determines planning applications. However, the Local Plan only sets the overarching policy approach to planning in Fenland: this SPD provides more detailed guidance on how Policy LP14 will be implemented.

## **2. Compliance with Regulations**

- 2.1. The Town and Country Planning Regulations 2012 require the Council to consult the public and stakeholders before adopting a SPD. Regulation 12(a) requires the Council to prepare a statement featuring details of those who the Council consulted; a summary of the main issues raised during the consultation; and details of how these issues were addressed by the Council and any consequential changes to the SPD.
- 2.2. The consultees invited to comment on the January 2014 draft of the Resource Use SPD during the consultation period included: all parish councils in and around Fenland; neighbouring district and county councils; local businesses; interest/pressure groups; religious organisations; infrastructure providers and any other body, party or individual that has specifically requested to be informed of Neighbourhood Strategy (Planning Policy) consultations. A list of the organisations consulted can be found in Annex A.
- 2.3. The table below summarises all the main issues raised during the consultation period and Fenland District Council's response to the issues raised. All comments received have been read and considered in detail. If no changes have been made as a result of comments received, the reason/s for this is explained.

### 3. Issues raised during public consultation (14 Jan- 24 Feb 2014)

Item	Main issues raised (summary)	Council's Response	Change to SPD
GENERAL			
1	<p>SPDs should build upon the policies in the Local Plan and cannot be used to introduce new policies.</p> <p>Many of the proposed policies should only be taken forward through a Local Plan or other Development Plan Document.</p>	<p>There is certainly confusion, nationally, as to the scope of what an SPD can contain. This confusion has arisen since the publication of the new plan making regulations in 2012 (The Town and Country Planning (Local Planning) (England) Regulations 2012), which in one regulation (5) implies SPDs cannot contain policies, yet another regulation (8) states "Any policies contained in a supplementary planning document..." which clearly implies policies can be included.</p> <p>The confusion was further compounded when the 'beta' (draft) Planning Practice Guidance website was issued in 2013 and stated that SPDs cannot be used to introduce new policies. However, the final Planning Practice Guidance website has now been launched (2014) and the statement that SPDs cannot be used to introduce new policies has been removed and there is no longer any such reference to the content of policies within SPDs (see National Planning Practice Guidance, Ref ID 12-028-20140306).</p> <p>Nevertheless, it is conceded that perhaps some of the draft policies in the SPD as consulted upon may be considered to go beyond the legal remit of a SPD.</p>	<p>Partly as a concession to the representations received and partly after reconsidering the regulations and national policy, Part 3 of the SPD and the policies within this section have been restructured and reworded to demonstrate more explicitly how the SPD and the policies expand on the principles outlined in policy LP14 of the Local Plan. These changes make it clear that the policies are not completely new policies, but rather they complement existing (Local Plan) policies.</p> <p>Specifically, each of the wind turbine, solar and biomass sections have been restructured to contain policies entitled as per the factors listed in part A of policy LP14 (i.e. the factors that will be taken into account when assessing proposals for renewable energy). Some of the principles featured within the first draft of the SPD have been retained and simply re-distributed under the appropriate new policy headings, while some principles have been amended or removed in light of comments received during the consultation, as summarised below.</p>

2	Why has fracking for shale gas production not been considered?	<p>Fracking for shale gas has not been considered under the Renewable Energy part of the SPD because shale gas is not a renewable form of energy.</p> <p>The purpose of the SPD is to expand on policy LP14 of the Local Plan, which focuses on minimising resource consumption and assessing renewable energy proposals.</p>	Reference to shale gas fracking not included.
<b>PART 2</b>			
3	In relation to the lists in Part 2, sustainable urban drainage systems (SUDs) should not be seen as the 'golden solution' to the problem of increased run off rates due to urban creep. The specification of some permeable paving is quite demanding (materials, maintenance and deterioration considerations).	Noted.	Reference to permeable materials (item 13, List 1) removed in light of the recent intention of Cambridgeshire County Council to produce a county wide Floods and Water SPD by 2014-2015 and in light of overarching policy LP14 Part (B) of the Local Plan.
<b>PART 3- GENERAL</b>			
4	Appendix A includes a requirement for wind turbines and solar schemes to include reference to site	Noted.	Appendix A removed in its entirety in light of the revisions to the SPD policies and the fact that the information is largely covered by other guidance available from the Council.

	selection. There is case law in relation to this matter and it is evident that there is not a requirement to consider other sites within the assessment of any planning application.		
5	Draft SPD does not reflect transport safety considerations in relation to wind turbine, solar and biomass developments.	Noted.	Additional wording in relation to road safety incorporated in revised policies WT4 (a– e), S4 (a,b) and B4 (a– e), ‘Highway safety, designated nature considerations and biodiversity considerations’.
6	A distinction is made between heritage assets and archaeological remains throughout the SPD when in fact archaeological remains come under the term heritage asset.	Noted.	Distinction removed throughout the revised policies which relate to heritage assets (WT1, S1 and B1). Definition of heritage assets in Glossary amended to be as per definition in National Planning Policy Framework.
7	Policies relating to heritage assets not consistent with NPPF.	Noted.	The policies relating to heritage assets have been revised to be consistent with the NPPF. The revised principles in relation to heritage assets are featured under policies WT1, S1 and B1, ‘Surrounding landscape, townscape and heritage assets’.
8	Why are there three biodiversity sections (i.e. one for wind, one for solar and one for	The renewable energy element of the SPD is split into three sections for user friendliness: if someone is referring to the SPD for guidance on solar development, they only need to refer to that section. Whilst some policies are	No change: the three wind, solar and dry biomass and anaerobic digestion sections are retained.

	biomass)?	very similar throughout the SPD, in some instances there are policy distinctions between the various types of renewable energy development to reflect specific considerations in relation to that technology.	
9	Perplexed as to why a section on water and flood risk has only been included for biomass and not wind and solar developments.	Policy LP14 of the Local Plan was considered to provide sufficient policy guidance for the determination of wind turbine and solar proposals.	Draft policy B7 Water and Flood Risk (biomass section), has been removed in light of the recent intention of Cambridgeshire County Council to produce a county wide Floods and Water SPD by 2014-2015: it is considered that Part (B) of Policy LP14 of the Fenland Local Plan and the anticipated county wide SPD will provide detailed guidance in relation to water and floods and thus it is not necessary to cover water and flood risk within the SPD.
10	There should be some reference to the Floods and Water SPD that Cambridgeshire County Council anticipate to produce by 2015.	The anticipated production of the Floods and Water SPD is noted.	Reference to the anticipated Floods and Water SPD has not been included to avoid confusion in the event that it is not produced as anticipated or it is given an alternative title.  The revised Resource Use and Renewable Energy SPD no longer includes any flood risk policies in light of the overarching strategic policy guidance of Part B of policy LP14 of the Local Plan and in light of the anticipated county wide Floods and Water SPD.
11	Reference made to 'unacceptable adverse impacts' but it is not clear what an acceptable adverse impact might be.	Noted.	The term 'unacceptable adverse impact' has been removed. The term 'adverse impact' is used, and in some instances examples are given as to how adverse impact could be mitigated against. It will be a matter for decision makers to make an informed judgement as to whether an impact is adverse.
12	Recommend that		The requirement for applicants to submit a LVIA to

	relevant policies include a requirement for planning applications to be supported by a Landscape and Visual Impact Assessment (LVIA).	Some of the revised policies require applicants to 'demonstrate' that they have minimised impact or given due consideration to the impact of a proposal: applicants may choose to submit a LVIA as part of their evidence in relation to such policy requirements.	support their application has not been added to relevant policies: applicants may choose to submit a LVIA as part of their evidence.
WIND TURBINES			
13	It would be particularly useful for the SPD to provide more detailed guidance on the level of ecological information required for an Environmental Impact Assessment (EIA) and Habitats Regulations Assessment (HRA) for larger scale wind turbine developments. Ideally guidance would also be provided as to this requirement for smaller scale developments.	Advice on EIA and HRA is available from Fenland District Council upon request.	No change.
14	The approach to categorise turbines by particular height is considered to be unnecessary and	Noted.	Wind turbine categorisation removed: the policies for wind turbines, solar and dry biomass and anaerobic digestion development have been restructured and reworded as part of the amendments detailed under item 1 of this schedule and are intended to be more strategic

	potentially dangerous. The height of a turbine or turbines is but one factor in the overall consideration of the merits of a scheme.		and overarching.
15	The normal practice when seeking planning permission for a large wind turbine is to, once planning permission has been granted, tender out the design and specification of the wind turbine so the developer is likely to be unwilling to provide the information referred to in policies WT1 to WT5.	Noted.	Caveat added to revised policy WT2: in instances where the applicant is unable to provide specific design details as part of their application, the principles of Local Plan policy LP14 and in turn revised SPD policy WT2 (a-h) will be applied through planning conditions (as necessary), if the scheme is approved.
16	Regarding policy WT16, is the prescriptive 4km separation entirely justified.	Noted.	As part of the wider restructure of the SPD and policy rewording (detailed under item 1), all separation distances (except those relating to safety) have been removed.  Revised policy WT2 (part m) relates to cumulative visual impacts.
17	With regards to residential amenity it is considered appropriate to utilise the Lavender	Noted.	Elements of the 'Lavender test' wording have been incorporated in revised policy WT2 (part i), 'Residential and visual amenity', in light of notable reference given to the 'test' in recent wind turbine appeals, including the

	Test wording as this has been used by the Secretary of State.		recent Fenland Treading Wind Farm appeal decision.
18	<p>Purpose of map is not clear: SPD is contradictory by stating that the mapping is advisory only and does not form part of the development plan for Fenland, however, it will be used to 'assist in the determination of applications'. It is not clear what weight will be given to this map.</p> <p>The map which shows the existing wind turbines within the District and adjoining it requires updating.</p>	<p>The map is intended to be for information purposes only, given that:</p> <ul style="list-style-type: none"> <li>- not all relevant information is captured on the map (e.g. details of conservation areas, etc)</li> <li>- the map represents a particular point of time (i.e. further turbine development may be approved following the production of the latest version of the map).</li> </ul> <p>Need for updated information noted.</p>	<p>The map has been retitled 'Map of existing turbines and key landscape characteristics' to avoid the potential misconception that the map depicts all constraints.</p> <p>Text in the SPD revised to clarify that the map is for information purposes only.</p> <p>It should be noted that as the map is not a 'live' map, it may not contain details of recently approved wind turbine developments. Fenland District Council will aim to update the map regularly: the latest version of the map will be available on the Council website.</p>
19	Map: the 1km buffer around designated sites does not adequately reflect the sensitivity of the areas.	The 1km distance indicated was not intended as a buffer, but as an indication of distance.	1km radius removed from map to avoid confusion.
<b>BIOMASS</b>			
20	An important question is	The control of the type of crop grown on agricultural land	No change.

	<p>whether biomass facilities will have associated land on which biomass crops are grown (crops with invasive roots systems or cultivation/ harvesting methods): these are major sources of concern where archaeological sites are quickly destroyed by the inappropriate change of land use from standard arable crop to biofuel crops.</p>	<p>is beyond planning controls.</p>	
<p>21</p>	<p>It would be helpful if the SPD advised applicants that if the biomass facility proposed deals with generation of energy from waste, then the application is a County Matter and will be dealt with by the County Council. If this is the case the County Council's 'The Location and Design of Waste Management Facilities'</p>	<p>Noted.</p>	<p>Text to this effect added under the biomass section in Part 3.</p>

	SPD (2011), will apply.		
--	-------------------------	--	--

#### 4. Other changes identified by Fenland District Council

In addition to the changes identified as a result of the public consultation, the Council has also identified changes which are necessary as a result of: amendments to the submission version of the Core Strategy prior to its formal adoption (renamed at adoption to be Local Plan); typographical errors; and amendments identified to ensure the content of the SPD remains relevant. The main changes are outlined below.

	Change to SPD	Reason for change
22	Quotes from proposed submission version of policy CS14, Responding to Climate Change and Managing the Risk of Flooding in Fenland, replaced with quotes from adopted policy LP14 (same title) throughout.	Amendments made to policy CS14 between proposed submission version of Core Strategy and adopted version (renamed Local Plan at adoption).
23	Deletion of allowable solution section (Part 4).	Government guidance on the specific framework under which Allowable Solutions will operate has not been defined yet. It is considered that Part 4, Allowable Solutions of the SPD does not provide any further guidance to that provided by policy LP14 of the Local Plan and therefore it is considered appropriate to remove this section.
24	Title revised to 'Resource Use and Renewable Energy Supplementary Planning Document' (formerly 'Resource Use SPD').	In light of the removal of the allowable solutions element of the SPD, it is considered appropriate to expand the title to be 'Resource Use and Renewable Energy SPD' rather than the abbreviated 'Resource Use SPD'.
25	Part 1 Introduction and Context: content revised and section restructured.	To make the section more logical and concise.
26	Part 3 Renewable Energy: 3.3 Context-Existing Renewable Energy Generation in Fenland removed.	Wind turbine statistics provided may become quickly outdated. No similar statistics provided for other renewable energy generation within the district.

27	Part 3 Renewable Energy: 3.4 Context-Planning Policy and Guidance- edited.	Considered unnecessary to feature details of several documents: only details of main documents referred to retained for information purposes and to provide a brief context.
28	Biomass section in Part 3 expanded to be applicable to both dry biomass and anaerobic digestion.	Fenland District Council have received applications for anaerobic digesters therefore it is considered appropriate to incorporate policies for such developments within the SPD. It is considered appropriate to incorporate anaerobic digestion within the biomass section.
29	Glossary updated	To reflect changes to SPD content.
30	Appendix A removed.	In light of revisions to policy content and the fact that the information is largely covered by other guidance available from the Council.
31	Appendix B removed.	Although potentially useful to some applicants, this appendix is not essential and has thus been removed. Details of conditions imposed on approved renewable energy schemes can be found on decisions notices which are publicly available on the Fenland District Council website.
