

Equality Impact Assessment (EQIA) Screening Form – V2 Template – November 2024

A successful EQIA screening will look at 5 key areas:

1. Identify the Policy, Project, Service Reform or Budget Option to be assessed.

A clear definition of what is being screened and its aims.

2. Gathering Evidence and Stakeholder Engagement

Collect data to evidence the type of barriers people face to accessing services (research, consultations, complaints and/or consult with equality groups).

3. Assessment and Differential Impacts

Reaching an informed decision on whether or not there is a differential impact on equality groups, and at what level.

4. Outcomes, Action and Public Reporting

Section 2: Gathering Evidence and Stakeholder Engagement

The best approach to find out if a policy, etc. is likely to impact positively or negatively on equality groups is to look at existing research, previous consultation recommendations, studies or consult with representatives of those groups. Section 3: Assessment and Differential Impacts

Use the table below to provide some narrative where you think the Policy, Project, Service Reform or Budget Option has either a positive impact (contributes to promoting equality or improving relations within an equality group) or a negative impact (could disadvantage them) and note the reason for the change in policy or the reason for policy development, based on the evidence you have collated.

Please note that:

- a Positive Impact could benefit an equality group and a negative impact could disadvantage an equality group
- for reasons of brevity race is not an exhaustive list – please edit the list if appropriate to reflect the complexity of other racial identities
- a definition of disability under the Equality Act 2010 is available on the [gov.uk website](http://gov.uk)
- there are too many faith groups to provide a list, therefore, please input the faith group e.g., Muslims, Buddhists, Jews, Christians, Hindus, etc. Consider the different faith groups individually when considering positive or negative impacts
