Addendum to Proposed Submission of Core Strategy DPD - Removal of North East March Allocation Consultation

Thank you for the opportunity to comment on this document.

From Anglian Water view, the removal of North East March (upto 450 dwellings) and the increase in numbers at South west March (from 300 to 500) will not significantly change the original response to the site allocations made in April 2013 . The foul sewerage network will require upgrades for either level of growth in South west March , the exact details to be determined when we are approached by developer(s).

The increase of 250 in windfall, as the document suggests is more difficult to assess, however we will make that assessment on a site by site basis when we are approached by developer(s).

Overall, AW support the most sustainable approach to growth in Fenland and have no reason to doubt that it is legally compliant and sound.

Please do not hesitate to contact me should you wish to discuss.
